

**EUR 50 million to ensure continuation of EU integrated maritime policy
(Agence Europe)**

On Thursday 30 September, the European Commission adopted a proposal for a regulation establishing a support programme for the development of integrated maritime policy. The sum of EUR 50 million is foreseen from 2011 to 2013 to support measures foreseen with a view to promoting the development and implementation of integrated maritime policy. In particular, synergies are to be unleashed by bridging between all policies with an impact on the sea, such as transport, fisheries, customs and protection of the marine environment.
